Dear Sir:

Applicants respectfully request entry of the following amendment to claim 34 to correct an irregularly drawn structure. This amendment is filed concurrently with the payment of the issue fee and applicant respectfully requests entry of the amendment pursuant to MPEP 714.16 and 37 C.F.R. § 1.312.

The structure as now drawn was presented in the original specification at page 18, so no new matter is being added by this amendment. The amendment does not raise any issue not previously considered by the Examiner.

Applicants also request entry of the attached Substitute Formal Drawings. They replace Figures 1A-1C, which were entered by a request filed on January 31, 2002. The drawings submitted

herewith correspond to the figures as originally submitted, differing only in the last structure in the left column on page 2 of 10. The presently submitted Substitute Formal Drawings correct drawing errors inadvertently entered when the substitute formal drawings submitted in 2002 were created, and correctly represent a nitro group on page 2. The nitro compound as presented was present in the originally filed specification at page 18, and hence adds no new matter. Thus applicants respectfully request entry of the new Substitute Formal Drawings prior to issuance.
